

Skyrocket Your Salesforce Change Management With Prodly DevOps

Manage your entire Salesforce DevOps cycle from a single pane of glass with Prodly DevOps. Built on the Salesforce platform and integrating seamlessly with DevOps Center, it offers powerful automation for work management, sandbox management, release management, source control, and compliance. Developed with collaboration between admins and developers in mind, it enables teams to work together using the tools of their choice.

Salesforce DevOps Features to Accelerate Innovation with Less Risk

Centralized Work Management

Salesforce work management integration lets you plan agilely and collaborate with industry-leading collaboration tools.

Instantaneous Environment Setup

Salesforce work management integration lets you plan agilely and collaborate with industry-leading collaboration tools.

Streamlined Deployments Cut Busy Work by 80%

Quickly and easily deploy changes with the #1 data migration tool for Salesforce. Automatically maintain object relationships and map record IDs across orgs.

Prebuilt Automations

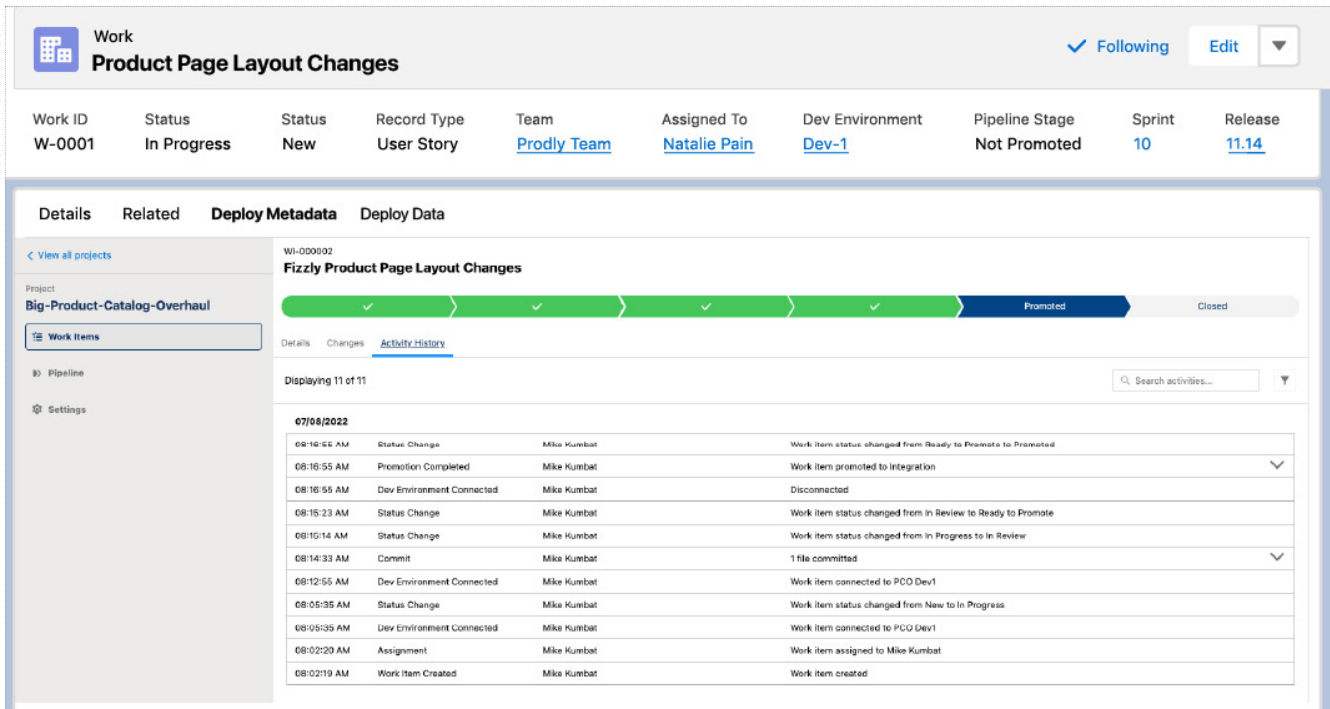

Leverage prebuilt automations for Sales Cloud, Revenue Cloud, Service Cloud, Field Service, Industry Clouds (Vlocity), Experience Cloud, AppExchange, custom apps, and org merges.

Effortless Governance and Compliance

Prodly DevOps offers separation of duties and automatically creates an audit trail of every change you make.

Powerful Performance to Streamline Your DevOps Cycle

API access offers you the flexibility to integrate Prodly into your existing CI/CD pipeline and further automate tasks.

The screenshot shows the Prodly DevOps interface for a work item titled "Fizzy Product Page Layout Changes". The interface includes a top navigation bar with "Work", "Following", and "Edit" options. Below this is a summary row with fields for Work ID (W-0001), Status (In Progress), Record Type (User Story), Team (Prodly Team), Assigned To (Natalie Pain), Dev Environment (Dev-1), Pipeline Stage (Not Promoted), Sprint (10), and Release (11.14). The main content area is divided into "Details", "Related", "Deploy Metadata", and "Deploy Data" tabs. The "Activity History" tab is active, displaying a list of 11 activities for the work item. The activities are as follows:

Timestamp	Event	Actor	Description
08:02:19 AM	Work Item Created	Mike Kumbat	Work item created
08:02:20 AM	Assignment	Mike Kumbat	Work item assigned to Mike Kumbat
08:05:39 AM	Dev Environment Connected	Mike Kumbat	Work item connected to PCO Dev1
08:05:39 AM	Status Change	Mike Kumbat	Work item status changed from New to In Progress
08:12:55 AM	Dev Environment Connected	Mike Kumbat	Work item connected to PCO Dev1
08:14:33 AM	Commit	Mike Kumbat	1 file committed
08:10:14 AM	Status Change	Mike Kumbat	Work item status changed from In Progress to In Review
08:15:23 AM	Status Change	Mike Kumbat	Work item status changed from In Review to Ready to Promote
08:16:55 AM	Dev Environment Connected	Mike Kumbat	Disconnected
08:16:55 AM	Promotion Completed	Mike Kumbat	Work item promoted to Integration
08:16:55 AM	Status Change	Mike Kumbat	Work item status changed from Ready to Promote to Promoted
